INTRODUCTION

As a police organization, the gathering and analyzing of statistical data is vital to police organizations. Statistics are necessary for overall police operations and form the basis of how we do our job and utilize resources. The Royal Newfoundland Constabulary's (RNC) Annual Juristat Report presents information on the short and long-term crime trends, violent and non-violent crime, at the provincial level within RNC Jurisdiction (Northeast Avalon, Corner Brook, and Labrador). Police-reported crime statistics represent one way to measure the nature and extent of crime in RNC jurisdiction.

Data on incidents that come to the attention of police are captured and forwarded to the Canadian Criminal Justice Statistics (CCJS) according to a nationally approved set of common scoring rules and definitions. The reader should note, however, that many factors could influence official crime statistics. These include reporting by the public to the police, reporting by police to the CCJS, and the impact of new initiative such as changes in legislation, policies or enforcement policies (Source: CCJS).

Acts that are chargeable under the *Canadian Criminal Code* are classified as criminal acts or 'crimes'. Examples of these acts include assault, mischief, and theft of vehicle. These acts are recorded using a police-reporting system and available for statistical and criminal review and analysis for the purpose of the RNC Annual Juristat Report. To provide a complete analytical review of police-reported data, a strategic analysis approach was utilized. Strategic crime analysis is concerned with operational strategies and provides information for resource allocation purposes. Its purpose is to identify unusual crime activities over certain periods of time and to provide police services more effectively and assist in community policing.

When an amendment to the *Criminal Code* creates a new offence or broadens the definition of an existing offence, the number of incidents reported to police will likely increase. This report is produced to demonstrate the scale, number and nature of recorded crimes offences and incidents within RNC Jurisdictions. It is intended for current topics of interest to the justice and public community and provides a detailed analysis of statistics on numerous topics and issues concerning RNC crimes rates.

DATA SOURCES

To capture the calls for service that are being received by the Royal Newfoundland Constabulary, an in-house computer system called ICAN (Integrated Constabulary Automated Network) is used. Part of the ICAN network is composed of RMS (Records Management System) and CAD (Computer Aided Dispatch). Geographical Information Systems (GIS) technologies are used to "map crime" as a tool to assist and enhance problem solving and intelligence lead policing. To capture victim information, gender, and classification an in-house computer system called Report Warehouse is used.

The RNC 2016 Annual Juristat Report was prepared by the Information Services Division. Statistical data provided in the 2016 Annual Report is based on data uploaded on April 13, 2016. Please note that statistical data may change due to ongoing investigations, data review, and data quality.

ANOMALIES

In 2016, there was a change in UCR codes, relating to violations involving exploited persons, in congruency with the UCR adoption of Bill C-36: An Act to amend the Criminal Code in response to the Supreme Court of Canada decision in *Attorney General of Canada v. Bedford* and to make consequential amendments to other Acts.

In 2013, there was a change in reporting for offences in Corner Brook resulting in a variance in their statistical data from previous years. This change does not indicate an increase in crime offences.

In 2012, the UCR codes 'Theft of Motor Vehicle over \$5000' and 'Theft of Motor Vehicle under \$5000' were replaced with one UCR code 'Motor Vehicle Theft'. Prior to 2012, the old UCR codes will be used to ensure the accuracy of statistical data.

In 2012, the RNC data showed a significant decrease in the crime incident rate for *Other Federal Statutes*. This was due to a change in reporting procedures of the Royal Newfoundland Constabulary and not due to a decrease in crime.

Data reported for 2009 and years prior are accurate to the date that the data was originally retrieved in 2010 and is unable to be confirmed based on the retention period of specific UCR codes.

In 2008, numerous significant amendments were made in the process for crime reporting. These changes in policies had a direct impact on police-reported statistics. When an amendment to the *Criminal Code* creates a new offence or broadens the definition of an existing offence, the number of incidents reported to The Royal Newfoundland Constabulary will likely increase.¹ The most significant changes made to the criminal code were Crimes against Persons. In specific, UCR Code 1340: *Other Sexual Crimes* expired as of March 31, 2008, and was broken down into 7 specific offences. The two most important changes effective April 1, 2008, were UCR code 1626: *Harassing Phone calls* and UCR Code 1627: *Uttering Threats to Persons*.

In 2007, the RNC data showed a significant increase in the crime incident rate for *Disturbing the Peace, Impaired Driving, and Other Criminal Code offences*. This was due to a change in reporting procedures of the Royal Newfoundland Constabulary and not due to an increase in crime. This increase coincided with the establishment of new policy regarding the classification of calls for service. Thus, this change in record keeping method resulted in a considerable statistical increase.

In 2006, the RNC and RCMP B (NL) Division identified some inconsistencies in reporting procedures to CCJS. Therefore, crime data between the two agencies is not directly comparable.

Total Victim Violations is the total number of offences which have been reported by a victim in an incident.

For example, one male may be a victim of a Robbery with Firearm and Assault and one female may be a victim of Assault and Uttering Threats to a Person.

Total Count = 1 male victim reporting 2 offences.
= 1 female victim reporting 2 offences.

Total Victim Violations = 4
Total Victims of Violence = 2

Victims of Violence can be victims of more than one violent offence.
